

ORCHARD organic farm

SOIL ASSOCIATION ORGANIC APPLES

Orchard Organic Farm is a mixed family farm situated on the South Devon coast at Stokeinteignhead, on fertile grade II red soils. We have farmed organically in accordance with the Soil Association's strict standards since 1995 and entered the Countryside Stewardship Scheme nine years ago. **We are proud to be Organic.**

We planted a 3 acre orchard of (now) over 800 apple trees of mixed varieties plus plums and cob nuts twelve years ago, which are all grown to the Soil Association's standards. **Our apples are produced without use of chemical sprays or fertilisers, we hope you enjoy them.**
