

# ORCHARD organic farm

## Our Farm

**Orchard Organic Farm** is our mixed, family farm situated on the South Devon coast. We have farmed organically in accordance with the Soil Association's strict standards since 1995 and are proud to be Organic. Our laying hens live in small flocks, happily roaming free range in our organic apple tree orchard and fields. The welfare of our hens is our key priority. In addition to their grazing, the hens have unlimited access to feed which includes of our home grown organic corn. Please feel free to contact us for any further information.
